

Ryegate Power Station

**247 Weesner Drive
East Ryegate, VT 05042
Tel: 802.633.3500
Fax: 802.633.3504
Email: mark.driscoll@suezenergyna.com**

The Ryegate Power Station burns 250,000 tons of whole tree chips per year, while providing reliable electricity to the area. Since the wood fuel contains no sulfur the emissions from the facility do not contribute to the acid rain. The by-product from wood-fired power facilities is wood ash, a natural lime substitute and a valuable soil additive. The Ryegate facility distributes more than 4,000 tons of ash wood per year that is used in many beneficial recycling programs.

QUICK FACTS:

In-Service Date	11/01/92
Percent Ownership	66%
Percent Partners	34% Catamount Energy Inc.
Fuel-Primary	Waste Wood
Fuel-Secondary	Propane
Resource Type	Base Load
Electric MW	20 MW (net)
Electric Customer	Vermont Electric Power Producers Inc. (VEPPI)
